

ENTREX TECHNOLOGY BACKGROUND:

Entrex is a proven, blockchain-enabled, regulator reviewed, alternative trading marketplace for investors to find, research, track, manage, and trade alternative securities.

Collectively our platforms:

Originate: Alternative Securities

Structure: Offerings

Offer: Fractionalized securitizations

Place: Through regulated parties

Trade: Through platform portals.

Settle: Trades between parties
and

Service: Interest bearing securities

Our IBM technology platform provides robust, scalable, capabilities allowing diversified sectors access to an industry focused platform to buy and sell alternative securities between parties.

Working together with industry sector leaders our platforms offer individual or institutional investors access to a simple, robust and compliant platform which offers trading solutions for their alternative portfolio needs.

Today Entrex manages a regulatory compliant domesticated ledger to support all user's regulatory oversight needs.

Entrex can push offerings, trades and settlement out to the blockchain as securitization technology become standardized; supporting global immutable ledger transactions.

Our various platforms offer proven compliance and performance for financial institutions and investors interested in trading and managing alternative assets.

REAL ESTATE - TRADING PLATFORM:

Entrex's real estate trading platform offers real estate developers and their investors access to an efficient, regulatory compliant, trading solution to *find, research, track, manage and trade* their Real Estate Interests.

Investors in commercial real estate development interests can now simply and discretely buy and sell interests by managing their alternative investment portfolio on the Entrex Real Estate Securities Trading Platform.

Investors can issue "buy" or "sell" orders based on their desires to effect their portfolio needs.

All buy/sell trading activity of Real Estate Securities are managed on a regulatory reviewed technology platform allowing control and monitoring by compliance entities and parties within each trade.

Settlement occurs efficiently; providing parties audit trails of any trade on both the buy and sell side of a transaction.

Trade audit trails are available on-line providing interested parties convenient access to the time/date, value and settlement details of a trade.

Real Estate securities can also be pushed out via regulated parties to sell; potentially at a premium, to other retail, accredited or institutional buyers pursuant to State, Federal and local securities laws.

As industry standardization occurs Entrex's eChain technology can distribute trade information to a global immutable blockchain ledger while managing an investors portfolio simplistically via their Entrex Owner Portal.
